# Some General Advice for Macro-Architecture

Not a good fit for customer facing

Shared state, communication/ navigation b/w apps

little → Hyperlinks

much → Legacy Apps or *very very* strong isolation needed?

yes → iframes

no → Need separate Deployment/ mix Technologies

yes → Web Components

no → "Majestic Monolith" w/ Libs and Monorepo

Micro-Architecture:
- *Libs/ npm packages*
- *Monorepo*
- *Web Components*
- *...*
